

BENEFITSCAPE™

ACA COMPLIANCE TY23: THE 4 STEPS

A REGTECH GUIDE: for employers on Oracle, ADP, Dayforce,
Workday & all major HCMs/ACA modules.

BENEFITSCAPE specialist regtech solutions work benefits magic for 1000s of US employers – cutting costs, saving resources, and transforming the business value & benefits experience for everyone.

ACA_regtech* transforms ACA governance, data flow, risk management & compliance on Oracle, Dayforce, ADP, and all major HCMs/ACA modules.

Our clients are organizations of all sizes, across all states, and in all sectors, including private, academic, and state governments.

Even the IRS hires us for our regtech.

Kim Phillips

FOUNDER & CEO

BENEFITSCAPE was founded in 2014 to apply advanced data science to employee benefits & is a certified member of the Women's Business Enterprise National Council [WBENC].

BENEFITSCAPE is the leading specialist in ACA reporting & compliance.

ACA_regtech*
is the leading
data solution for
ACA governance,
risk management
& compliance on
all major HCMs.

From penalty remediation •
systems integration • mid-
year conversions • and flag
& fix data optimization •

through eligibility and
affordability management •

error-free IRS coding •
all IRS forms • all employee
comms • and pro-active
risk management •

to 100% compliant •
penalty-free • IRS & state
e-filings • plus encrypted
digital **ACA Audit-in-a-Box**.

the 4 steps

1: GOVERNANCE

ACA_regtech* configures the relevant IRS rules and other ACA governance for each employer's unique employee population, health plans, business rules & operations, integrating seamlessly across all HCMs/ACA modules and data sources.

Diagnostics are run on prior filings to support remediation of any existing penalties.

2: RISK MANAGEMENT

In addition to pro-active Flag & Fix diagnostics throughout data processing, ACA_regtech* generates month-by-month or quarterly status reports and runs a full IRS compliance simulation prior to filing to further safeguard against errors and penalty risk.

3: IRS CODES

ACA_regtech* assigns error-free IRS codes to all eligible employees & generates a Compliance Map visualizing overall year-end compliance status.

All Form 1095-Bs & Cs are generated and securely distributed directly to employees.

4: FILING & COMPLIANCE

ACA_regtech* generates the employer's Form 1094 and uses an IRS-certified

Transmission Control Code [TCC] to e-file this form, the 1095s, and all other required data & documents to the IRS via IRS ACA Information Returns [IRSAIR].

ACA_regtech* processes all state-mandated filings in parallel with the IRS filing.
